PHILOSOPHY

The company's rule and institution is the complete and universal care of its customer especially after the sale, with the provision of specialized solutions on a case-by-case basis and full technical coverage

is a modern software development company that aims to find solutions by creating software and applications for the local and international market. The creation of sophisticated and flexible applications has established Tamiaki position on the market.

VISION

Despite the constant adjustment required of a company's targets depending on the competitive conditions of its environment, the ideas leading the strategic decisions are to remain firm over time. These constant values are the standard basis of the existing strategy, forming the business vision and define the position of the company.

In our efforts for healthy business dexterity / entrepreneurship with social responsibility, we try to succeed, having as assistant the deep trust in our partners and personal relationship with every one of our customer. Moreover, with predominant love for research and new technologies, we support young/new scientists and engineers and encourage the development of innovative ideas, often taking the risk of funding. Recognizing the need for a pleasant working environment, we invest in corporate facilities and promote programs for supporting the employees.

Throughout the long history of our company in the field of Information Technology and Hospitality, the main objective remains the originality and the authenticity of the solutions it offers, in order to increase the competitiveness of the Greek tourist market, the society and the development of new technologies in our country, with creativity and integrity.

WINPOS SOFTWARE (APPLICATION)

Winpos is a POS Touch application focusing in business market. It can be used as a standalone application or in a networked for more than one POS system. The flexibility of Winpos applications is that can works perfect and integrate in every kind of market and pos system. The competitive advantage of winpos is that we have created different work environment on the application, differently by the needs of each customer (Retail, Super Market Restaurants etc). That makes the user friendlier with the application.

The use of Winpos also extends to back office, since it can be applied not only to the cashier but also to any other computer on the network. In particular, sales, purchases, and any other statistical information are obtained. At the same time, it can be informed of any change involving new species, price changes, etc.

WINPOS HOSPITALITY

Great restaurant customer service includes taking orders, serving customers, and completing payment transactions as quickly and efficiently as possible. Tamiaki understands the point of sale (POS) technology your restaurant uses needs to make it happen.

You need hospitality POS hardware that gives you the tools you need to accept customers' preferred payment types and rugged and powerful enough to keep working in harsh kitchen environments and when transaction volume is high. We provide systems that minimize downtime due to damage from everyday use.

We also know in this time of rapid change in the hospitality industry, tough competition and thin margins, you need to get the most value from your POS investment.

WINPOS RETAIL

In the competitive retail industry, Tamiaki knows merchants need point of sale (POS) systems that helps them meet customer expectations for fast, efficient, accurate service. Our retail POS systems have the computing power to support today's POS software and business applications, and they accommodate a range of peripherals to suit your business' unique requirements and your brand.

Your POS software can help you architect great customer experiences and collect valuable data to help you improve and grow your business. Our POS hardware will help you bring out the best of your software solution's capabilities.

Retail is experiencing a time of rapid change, and Tamiaki understands you need solutions that can scale with your changing business and customer demand. Partner Tech has designed its retail POS solutions to meet these needs and more, helping you to maintain a sharp competitive edge and a healthy bottom line.
